DETAILED ACTION

This Office Action is in response to the amendment filed 6 May 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuzaki et al. (U.S. Patent 5,493,136).

Matsuzaki discloses a field effect transistor (Figs. 4,5 and 14) that contains a silicon channel layer (23) that is formed on a predetermined semiconductor layer (22) which is a gallium buffer layer, where the channel layer has an impurity concentration or composition ratio of $1 \times 10^{16}/\text{cm}^3$ or higher varying from low value to high value (Column 1, lines 15-22, Column 7, lines 37-40), a source region (26), a drain region (25) each having a bottom face above an interface between the predetermined semiconductor layer and the channel layer and provided within the channel and where the impurity concentration of the channel layer varies linearly and has a composition in which a saturation electron velocity varies from a low value to high value as getting away from the predetermined semiconductor layer. Since the concentration of the channel varies

linearly from low to high then the saturation electron velocity would vary from low to high values.

Response to Arguments

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
